DEVELOPMENT OF THE EGG

HOW THE QUEENS, WORKERS AND DRONES
DEVELOP FROM THE EGG AND THE TIME IT
TAKES

DEVELOPMENT OF THE EGG

4th day:

Egg hatches. Tiny grub nearly invisible and lying in a pool of brood food.

5th day:

Grub larger. More visible but still surrounded by brood food.

6th day:

Grub very visible. Brood food no longer visible.

7th day:

Grub nearly fills bottom of cell.

8th day:

Grub completely fills base of cell.

9th day:

Cell sealed. Grub not visible.

TIMES OF DEVELOPMENT (IN DAYS) OF QUEEN, WORKER AND DRONE
